

Thomas Woods	Co-opted Governor
--------------	-------------------

It is a great honour for me to have been appointed as a Governor for Childwall Sports & Science Academy.

I am hoping to be able to leverage my skills to help Childwall continue to develop and grow. I am currently acting as Principle Electrical Engineer for a multinational waste management company, but I am imminently taking up a Project Management role within the Power Industry.

I recently came across Childwall through my volunteering as a STEM ambassador. As a local person from a non-selective, mixed gender school background, it was refreshing to see the great work being done in STEM in this sector at Childwall.

When the opportunity then arose to apply for governorship, I jumped at it. I am passionate about improving educational outcomes for all and will hopefully be able to use my skills picked up in my career to help give back to the community.
