General Covid-19 advice

If you have any of the main symptoms of coronavirus (COVID-19), get a PCR test as soon as possible. Stay at home until you get the result.

The main symptoms of coronavirus are:

- **a high temperature** – this means you feel hot to touch on your chest or back (you do not need to measure your temperature)
- **a new, continuous cough** – this means coughing a lot for more than an hour, or 3 or more coughing episodes in 24 hours (if you usually have a cough, it may be worse than usual)
- **a loss or change to your sense of smell or taste** – this means you've noticed you cannot smell or taste anything, or things smell or taste different to normal

People who are sick with coronavirus may have other flu like symptoms such as:

- body aches
- persistent headaches
- sore throat
- tiredness
- shortness of breath
- nausea or
- diarrhoea

If you don't have any of the main symptoms of coronavirus, you don't need to isolate until you get your result, however you do need to continue to take the usual measures to protect yourself and others from illness.
